Maria A. Wimmer chairs the research group eGovernment at the Institute for Information Systems Research. She studied Computer Science at the Johannes Kepler University of Linz, Austria. After her graduation, she had a two years research stay in Italy (research focus: holistic analysis and design of safety-critical systems in the area of train traffic control). Thereafter, she returned to the University of Linz, Institute for Informatics in Business and Administration and she turned her research focus on e-government and e-democracy. In 2000, she finished her doctoral thesis. In 2003, Maria A. Wimmer became Associate Professor (Habilitation) in Applied Computer Science and managed a number of research projects of the Institute in the area of e-government. From 2004 till 2005, she worked in the ICT operative unit of the Federall Chancellery in Austria (Vienna). Her thematic areas were interoperability, digital signatures of administrations, education concept for e-government for public servants, etc. Since November 2005, Maria A. Wimmer is Professor for eGovernment and chair of the research group eGovernment at the Institute for Information Systems (IS) research at University of Koblenz-Landau, Germany. Her main research and teaching foci are e-government and e-democracy / e-participation, systems analysis, systems design in terms of modelling and managing information and interoperation, processes and knowledge in a comprehensive way based on a holistic perspective.
